Experience

Advanced Academic Research in AI & Digital Media | 2026.03 ~ 2026.05

- 1) Analyzed state-of-the-art AI, computer vision, and healthcare papers published in top-tier conferences and journals.
- e.g., IEEE, CVPR
- 2) Identified the limitations of individual AI models.
- e.g., LLM-based 3D pose understanding, radar-based pose classification
- 3) Proposed multimodal convergence pipelines to overcome them..

Next-Generation Smart System & EdTech AI Application Design | 2025.09 ~ 2025.10

- 1) Designed authmated exercise pose classification and quantitative accuracy evaluation systems using MediaPipe in Virtual Reality (VR) environments.
- 2) Developed real-world application scenarios for STTF (Spatial-Temporal Transformer)-based pose assessment and correction frameworks in educational settings.
- 3) Planned the operational workflow of an AI-enabled smart mirror integrating MA-rPPG (biometric extraction), facial affect recognition, and conversational chatbots(GPT-4o, TTS).

Education

Chosun University | 2024.03 ~ 2028

Department of Artificial Intelligence Engineering

Year: 3rd year

Relevant Coursework: Machine Learning, Deep Learning, Algorithms, Data Structures, Web Programming

Technical Skills

- Programming Languages: Python, C/C++, JavaScript
- AI / ML: scikit-learn, PyTorch, NumPy, Pandas
- Web: HTML/CSS
- Tools: Git/GitHub, Jupyter Notebook
